Mescada

mespack
A DURAVANT COMPANY

NEW
Mescada

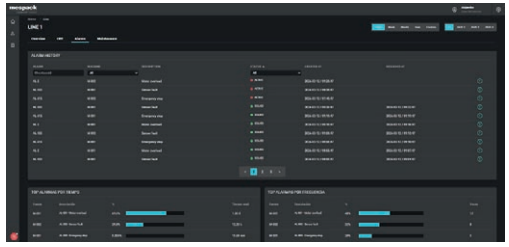

Connect every machine, optimize the full line

Mescada is the SCADA functionality available on Athena controls platform designed to integrate with Mespack's turnkey solutions, ensuring full compatibility with both our own machines and third-party equipment.

Real-time line monitoring

Track OEE, production, downtime, and other KPIs to optimize performance.

Reporting

Enables the generation of customizable reports that serve as a practical tool to identify improvement opportunities and increase efficiency, without the need for manual data analysis.

Maintenance

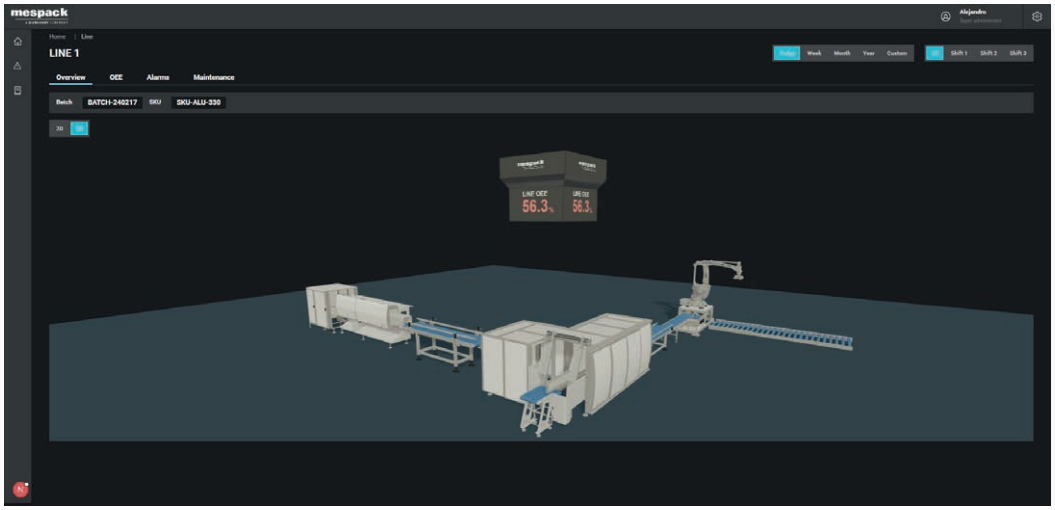

Plan and track maintenance activities to prevent failures, extend asset lifespan, and integrate effortlessly with CMMS platforms.

Batch and recipe management

Simplify batch execution and standardize recipes with centralized management and direct integration into your ERP and MES.

Intelligent agents

Full visualization of your entire line through the Mescada interface

Mescada is equipped with intelligent agents capable of understanding the production context, identifying improvement opportunities, and providing realtime assistance. These agents will be able to:

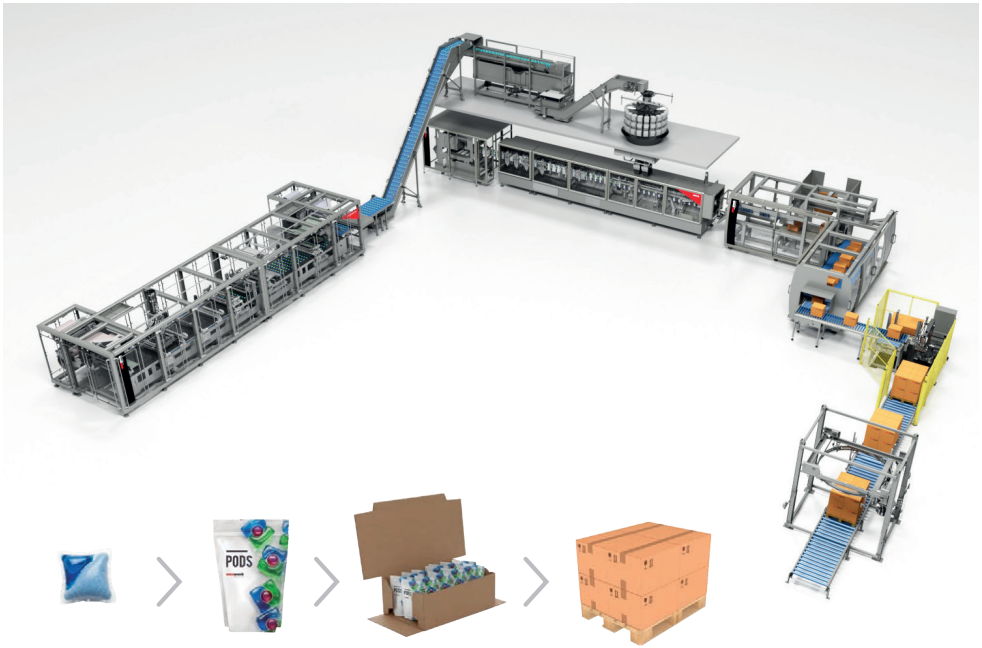

- Guide operators in resolving operational issues by proposing corrective actions.
- Assist in searching for documentation and knowledge by delivering relevant information on spare parts, configurations, or machine parameters.
- Analyze performance data to suggest adjustments that optimize the overall efficiency of the production line.

Turnkey solution with Mescada

By combining our **turnkey solution** with **Mescada smart connectivity,** Mespack delivers a production line that is fully operational from day one, enabling **higher productivity, minimized downtime, and consistent high-quality results**, all with a single trusted partner.

The Benefits of Implementing a Turnkey Project with Mespack

- **One unique supplier that is for the entire project**
- **Complete project vision**
- **One Dedicated Project Manager**
- **Proven Technical Solutions**
- **Profound Knowledge of flexible packaging solutions**
- **Mescada ensures seamless integration with machines**
- **Commitment to Sustainability and Energy Efficiency**
- **Time Savings**
- **Cost Optimization**
- **Quality Assurance**
